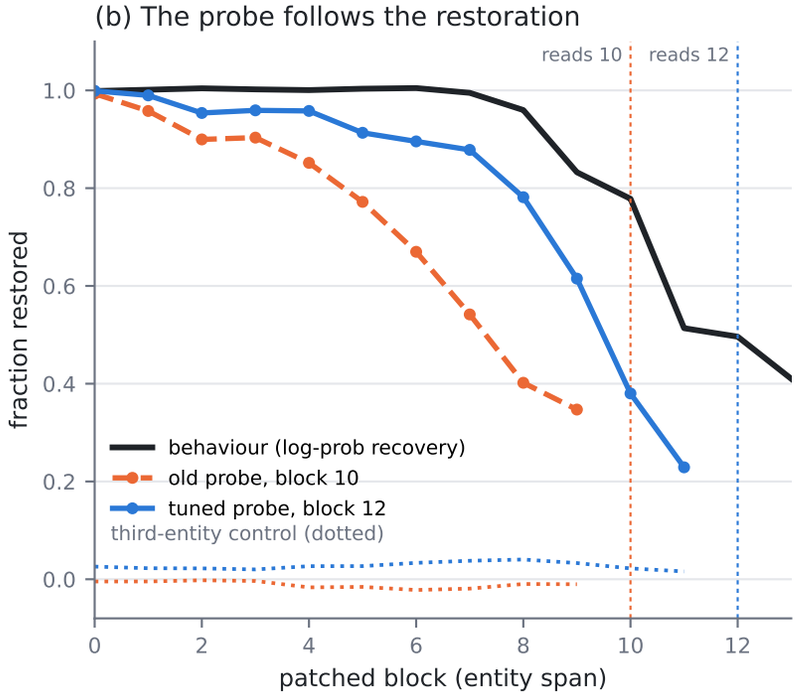
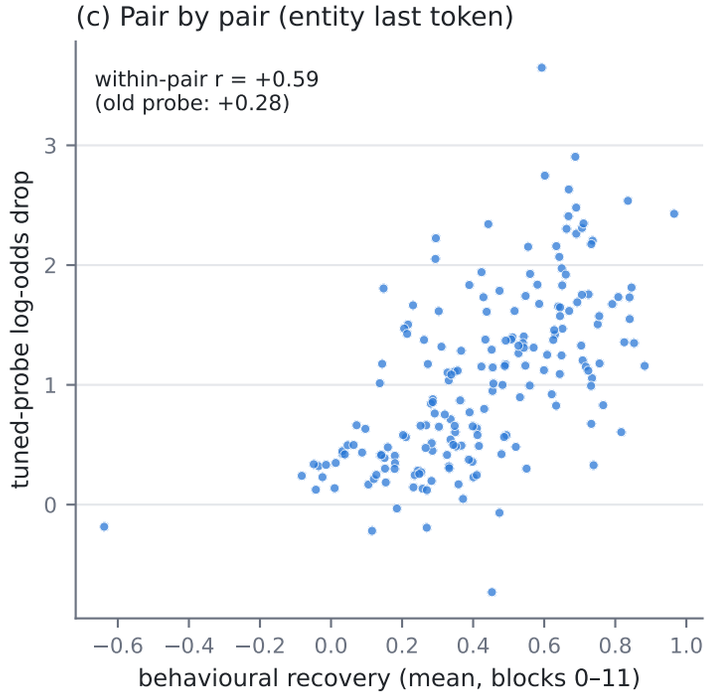
(a) Where the entity information lives
handoff
entity span
entity last token
tokens after entity
MLP at entity (±2)
last prompt token
recovery of the clean hop-1 log-prob
patched block



(b) The probe follows the restoration
reads 10
reads 12
behaviour (log-prob recovery)
old probe, block 10
tuned probe, block 12
third-entity control (dotted)
fraction restored
patched block (entity span)



(c) Pair by pair (entity last token)
within-pair r = +0.59
(old probe: +0.28)
tuned-probe log-odds drop
behavioural recovery (mean, blocks 0–11)
